**RULE:** A producer unit/farm shall be defined as an operation where all animals are under common ownership or supervision. In some situations animals pertaining to this premise may reside on two or more lots, farms or ranches that are geographically separated, but in which the animals have been interchanged or had contact with animals from different lots, farms, or ranches. If a business/farm manages two separate locations differently, then each should be considered a premise. If, however, multiple locations have animals moved between them regularly, they may be considered one premise.

**\* If you have more than two premises (animal locations) please request additional sheets.**
